Active U.S. Secret Security Clearance

SUMMARY

Secret-cleared CS senior graduating December 2026 with hands-on experience across full-stack development, cloud infrastructure (Kubernetes, Pulumi), and industrial controls systems. Shipped a React component adopted by two internal applications and built several personal products from scratch spanning mobile, web, and compiler design.

EDUCATION

Louisiana State University — Baton Rouge, LA *Expected: Dec 2026*

B.S., Computer Science | GPA: 3.66 / 4.0 | Dean's List

Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Compiler Construction, Digital Forensics

WORK EXPERIENCE

Bascom Hunter Technologies, Inc. — Baton Rouge, LA

Software Intern *May 2026 – Aug 2026*

- Deployed and stabilized production-style infrastructure stacks (PostgreSQL, SonarQube, OpenProject, identity/auth services) on a microk8s Kubernetes cluster using Pulumi (Infrastructure-as-Code), independently diagnosing and resolving persistent volume retention-policy conflicts, container registry restructuring, and local kubectl environment conflicts
- Documented root-cause findings and repeatable deployment runbooks in project READMEs and opened PRs, reducing ramp-up time for future stack deployments on the same cluster
- Built and shipped a reusable React component for an internal shared component library, generalizing it to support configurable data structures and publishing it via semantic-release to an internal registry, where it was adopted by two downstream applications

Advanced Systems Integration Consultants (ASIC, Inc.) — Baton Rouge, LA

Controls Engineering Intern — HMI & Industrial Automation *Jan 2026 – May 2026*

- Designed HMI operator screens (EcoStruxure Operator Terminal Expert) integrating live SCADA/PLC data for real-time monitoring of safety-critical oil-plant systems, and developed PLC ladder logic, I/O mapping, and panel wiring for control system commissioning

Air National Guard — Belle Chasse, LA

Staff Sergeant — Financial Management & Comptroller *Jun 2021 – Present*

- Manage financial systems supporting $2M+ in operational funds; process 500+ transactions at 98% accuracy while leading a team of 5 to certify transactions and onboard incoming financial staff

555 International — Chicago, IL

IT Support Specialist (Internship) *May 2023 – Aug 2023*

- Imaged and deployed 200+ devices; diagnosed technical issues with 95%+ first-contact resolution rate

PROJECTS

FitCheck — Fashion Social Commerce App | github.com/ljac128/FitCheck

- Cross-platform fashion social app (React Native + Expo + TypeScript) with a Firebase backend, supporting full CRUD, star-rating, closet management, and real-time Firestore reads across a 20+ user customer discovery cohort
- Selected for LSU Tiger Tank; pitched as a shoppable affiliate commerce startup to a panel of investors ($57K implied valuation)

Geaux Compiler — Custom Language Compiler | github.com/ljac128

- Built a full end-to-end compiler in Java using ANTLR4, implementing a lexer, parser/AST construction, static type checking, and code generation for a custom language grammar

Car Offer Analyzer | github.com/ljac128/Car-Offer-Analyzer

- PWA that evaluates used-car offers via depreciation modeling and OpenAI-powered fairness scoring; built with Next.js, React, and TailwindCSS

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C, Dart, HTML/CSS

Frameworks & Libraries: React, React Native, Next.js, Flutter, Expo, Firebase, TailwindCSS

Infrastructure & Tools: Kubernetes, Pulumi, microk8s, Docker, Git, Linux, CI/CD (semantic-release)

Other: GDB, pwntools, Wireshark, Power BI, Schneider Electric EcoStruxure (Control Expert, Operator Terminal Expert)
